# Reverse Engineering the DPDP Act, 2023

(Digital Personal Data Protection Act)

📅 23<sup>rd</sup> January, 2026 (Friday)

⌚ 3.00 pm to 4.00 pm

The webinar introduces a reverse-engineering lens, translating DPDP Act (Digital Personal Data Protection Act) 2023 and DPDP Rules 2025 into practical governance, operational, and system-level considerations. It helps DPOs, CISOs, and senior leaders move from paper compliance to demonstrable, defensible implementation.

Most DPDP Act discussions focus on clauses, penalties, and documentation. Let's take a different approach.

## Target Audience

- ▶ Data Protection Officers (DPOs),
- ▶ Chief Information Security Officers (CISOs)
- ▶ Privacy and GRC leaders,
- ▶ CIOs/CTOs
- ▶ Senior management
- ▶ Board members

## Mr. Sreenu Pasunuri

Cybersecurity and Privacy  
Governance Advisor

Mr. Sreenu Pasunuri is a Cybersecurity and Privacy Governance advisor with over 30 years of experience helping organizations design and operate resilient, regulator-ready data protection programs.
