Dear Members

As we are closing in on Presidential year of Federation, this is my last message to you all. The year 2022-23 was electrified and extremely fruitful year. This was all because of the whole-hearted support of all the esteemed members and your affection and confidence shown to me. As the Federation entered into many forays such as spreading its activities to Districts, imparting training through FTCCI Pokarna Skill Centre, conducting its maiden Expo on Industrial Innovation and Technology, the whole secretariat team and the expert committees worked very hard and made sure that every event and program was a huge success.

It is not only the events and programs at Federation that made the year eventful, but we are able to reach out to government to put forth the issues and challenges. When it was brought to Federation's notice that Peddapalli Municipality has imposed Trade License Fee at unreasonable rate of Rs. 12 per square feet against the guidelines, we brought it to the notice of Hon'ble Minister Sri KTR and Sri Jayesh Ranjan, Pri Secretary, they immediately resolved the issue.

The industries and commercial establishments are mainly concerned with imposition of Trade License Fee on Square Feet basis, and we are continuously writing to the Government to reconsider the decision and revert to old system with an upper limit. We hope that the government will take notice of difficulties and do the needful.

Federation is also appealing to the government to offer One Time Settlement (OTS) Scheme for Power Dues, so that, the units that are forced to shut down their operations due to power dues will be able to restart their units, thus creating employment to many people.

Telangana celebrated its Dasabdi Utsavalu. I must say that the State and its people had witnessed an incredible journey for 9 years. The economy of the state registered a double-digit growth consistently leading to increase in GSDP and per capita income by more than 2.5 times from 2014 to 2023. Agriculture sector production triples in the past nine years and the state became the second largest producer of paddy in the country.

Industrial and services sectors' performance is impressive. The state became the capital of vaccine's production and IT exports from the State registered an increase of Rs 57,706 crore taking the state's IT export figures to Rs 2,41,275 from Rs 1,83,569

President's Desk

Federation is also appealing to the government to offer One Time Settlement (OTS) Scheme for Power Dues, so that, the units that are forced to shut down their operations due to power dues will be able to restart their units, thus creating employment to many people.

FTCCI DELEGATION VISIT TO SURAT

THE SOUTHERN GUJARAT CHAMBER OF COMMERCE & INDUSTRY

7TH JULY, 2023

Telangana celebrated its Dasabdi Utsavalu. I must say that the State and its people had witnessed an incredible journey for 9 years. The economy of the state registered a double-digit growth consistently leading to increase in GSDP and per capita income by more than 2.5 times from 2014 to 2023.

last year(31.44%). Telangana's share of IT employment in the country over the last decade increased from 9.83 per cent to 27.6 per cent.

FTCCI is proud to be the partner in the State's journey and we are confident the state soon become most developed state in the country.

I congratulate all the FTCCI Excellence Award Winners and extend my best wishes to each and every company that have nominated for various awards. I thank our Hon'ble Minister Sri K.T. Rama Rao and Principal Secretary Sri Jayesh Ranjan, and Sri Anil Kumar Chalamalasetty, Chief Executive and Managing Director of Greenco Group for presenting the Awards to the winners. The event showcased the strength of industry in the state. From this platform, I thank Dr. Nageswar Reddy, Chairman, AIG Hospitals for accepting the Lifetime Achievement Award from FTCCI.

Programme on Water Security and Sustainability Approach for Industry highlighted the need for water conservation and judicious use of water, Groundwater Governance etc.

The FTCCI IITEX Expo 2023 was inaugurated by Hon'ble Minister for Power Sri Jagadish Reddy and Director, IIMR Dr. Satyavathi and Spl Secretary to Government of Telangana Mr. Vishnuvardhan Reddy and other dignitaries. The Expo was a huge success with more than 130 exhibitors and 9000 visitors.

I must inform the members that the Health Committee, under the leadership of Sri Shekar Agarwal is making extraordinary efforts to come out with a Vision 2030 Document on Affordable Health for All. More than 100 professional doctors from across the various segments like allopathy, Ayurveda, homeopathy, naturopathy medical streams have contributed to the document. I am extremely happy that the document is going to

be released on 12th July by Hon'ble Minister for Health Sri T. Harish Rao.

Federation, along with HYSEA has organized The IMPETUS conference featuring four different tracks focused on specific industries: Agri-tech, Food Processing, Manufacturing, and Pharma and Healthcare. These tracks explored the potential of adapting and accelerating digital transformation and digital innovation within each sector. The event aimed to inspire businesses to view themselves as technology companies and integrate digital strategies into their operations to enhance efficiency, reduce costs, and ensure long-term survival in a rapidly evolving digital landscape. I am pleased to inform that more than 400 companies participated and used the opportunity.

Through this platform, I express my sincere thanks to government of Telangana for their continued support to FTCCI.

Let us all resolve to make FTCCI one of the largest regional chambers in the country. Let us all together resolve to work for betterment of industry, trade and commerce by strengthening our voice and participating actively in various activities and discussions at every level possible.

I thank all the members for their cooperation and support throughout my tenure as Office Bearer and during the last one year that made my tenure memorable and eventful.

I wish all the members of FTCCI success in their endeavours and wish them all the best.

Anil Agarwal
President

Power ministry notifies scheme for trade in carbon credits

The power ministry on Friday notified the Carbon Credit Trading Scheme, 2023, to develop the domestic carbon market as the country aims at decarbonising the economy and has committed to cut emissions by 45% from the 2005 levels by 2030.

As per the scheme, the Centre will constitute a 20-22-member national steering committee (NSC), headed by the power and the environment secretaries, to govern and have a direct oversight of the carbon market. While the Bureau of Energy Efficiency (BEE) will finalise the procedures for institutionalising the Indian carbon market and formulate the rules and regulations under the guidance of NSC, the Central Electricity Regulatory Commission (CERC) will be the regulator for the trading activities. The registry for the Indian carbon market will be Grid Controller of India.

"Carbon credit is the value assigned to the reduction, removal or avoidance of greenhouse gas emissions achieved and is equivalent to one tonne of carbon dioxide equivalent (tCO₂e)," according to the scheme.

The BEE will identify the sectors, set targets for reduction in emissions, issue carbon credit certificates and accredit the carbon verification agencies.

The obligated entities will be issued carbon credit certificates if they do better than their set target of emission reduction. Entities unable to achieve their target will meet the shortfall by purchasing the certificates from the carbon market.

Govt issues guidelines for advance procurement of resources by discoms to ensure power supply

The government on Wednesday issued guidelines for advance procurement of resources by discoms to meet the electricity demand in a cost-effective manner. The guidelines, issued by the Union Ministry of Power, have been framed under rule 16 of Electricity (Amendment) Rules 2022, which were notified on December 29, 2022.

The "Guidelines for Resource Adequacy Planning Framework for India" has been issued in consultation with the Central Electricity Authority (CEA), the power ministry said in a statement.

"The guidelines will ensure that sufficient electricity is made available to power the country's growth, by putting in place a framework for advance procurement of resources by discoms to meet the electricity demand in a cost-effective manner.

"They provide for an institutional mechanism for resource adequacy ranging from the national level to discom level such that the availability of resources to meet the demand is ensured at each level," it said.

As per the guidelines, the new generation capacities, energy storage and other flexible resources, needed to reliably meet future demand growth at optimal cost, will be assessed well in advance.

The guidelines also suggest a share of at least 75 per cent of long-term contracts in a total capacity required by discoms as per the long-term national resource adequacy plan (LT-NRAP) or as specified by respective SERC.

The medium-term contracts are suggested to be in the range of 10-20 per cent, while the rest of the power demand can be met through short-term contracts.

The National Load Dispatch Centre (NLDC) will also carry out bids to procure any shortfall in the capacity required to meet the short-term Distribution Resource Adequacy Plans (ST-DRAP), after aggregating the individual plans of discoms.

The guidelines also provide for the number of years before which the procurement process by discoms must be completed, so that the procured capacity becomes available when it is required to serve the projected load.

"The guidelines are a major reform to provide consumers 24 x 7 reliable power supply at optimised electricity tariffs. The time-bound and scientific approach to assess the electricity demand for the future and taking necessary actions to procure resources in advance to meet this demand will ensure that the practice of load shedding by discoms and the occurrence of electricity supply crunch periods is avoided in future," Power, New and Renewable Energy Minister R K Singh said.

Ministry of Power Revises Biomass Co-Firing Policy for enabling purchase of biomass pellets by Power Plants at benchmark price

Ministry of Power (MoP) has decided to benchmark the prices of biomass pellets used for co-firing in Thermal Power Plants (TPPs). The decision comes in view of evolving market conditions for biomass pellets and requests received from stakeholders including thermal power plants, pellet manufactures, farmers, bankers etc.

The benchmarked price shall take into account the business viability, impact on electricity tariff and efficient & faster pellet procurement by power utilities. Price Benchmarking of pellets will enable the TPPs as well as Pellet Vendors to establish a sustainable supply mechanism for co-firing of pellets. The benchmarked price, as finalised by the committee under CEA, will be effective from 1st January, 2024.

Till the time the recommendations of the committee are implemented, the power utilities shall go for short term tenders for meeting the immediate requirement of biomass pellets for their TPPs.

Shri R.K. Singh, Union Power Minister said that co-firing of biomass in coal based power plants is a key policy of the Government towards energy security, reduced use of fossil fuels and at the same time to increase income of farmers. Revised policy shall help in achieving these goals faster.

Explaining the decision, Shri Alok Kumar, Secretary, Power said that the decision would encourage farmers, entrepreneurs as well as thermal power utilities to strive to establish a sustainable biomass ecosystem, achieve the targets for co-firing, reduce stubble burning and help to ensure a cleaner and greener future for the citizens of India.

In another modification of the policy, it has been directed that since availability of torrefied biomass pellets is presently limited in the country, the torrefied pellets shall only be procured by utilities for which it is technically unavoidable and utilities which can use non-torrefied pellets should utilise the same only.

In line with the Biomass policy, which mandates cofiring of Biomass with coal in Thermal Power Plants, so far around 1.80 Lakh MT of biomass fuel has been co-fired in 47 thermal power plants in the country

totalling a capacity of 64,350 MW. Out of this, more than 50000 MT has been co-fired during first two months of FY '23-24, which has also surpassed the previous highest ever annual quantity.

Further, about 1140 Lakh MT of biomass pellets are at various stages of the tendering. Purchase order has been placed for approx. 69 Lakh MT of biomass pellets by thermal power plants. With the enabling policies in place and thrust from MoP through SAMARTH mission, substantial growth of Biomass cofiring in TPPs across the country is envisaged.

Bureau of Energy Efficiency Build Up Demonstration Centre To Advance Clean Tech

The Bureau of Energy Efficiency (BEE) has built a demonstration centre under the direction of the ministry of power in a key step towards promoting sustainable technology and addressing the critical need for energy efficiency in diverse industry sectors. The facility wants to strengthen capacity-building initiatives and act as a one-stop shop for energy professionals all over India. Additionally, it will promote best practises, stimulate knowledge exchange, and offer significant contributions for national energy strategies.

Krishan Pal, a minister of state for power and heavy industries, officially opened the Unnat Takniki Pradarshan Kendra (UTPRERAK) at the National Power Training Institute (NPTI) in Badarpur, New Delhi. To

aid in the decarbonization efforts in these areas, the centre aims to develop cutting-edge technologies such as solar thermal, carbon capture, use, and storage (CCUS), and hydrogen. The facility will also make it easier to find technology information and present energy-saving innovations.

Krishan Pal emphasised the significance of the demonstration centre and how it is consistent with Prime Minister Narendra Modi's objective to advance technical advancement and environmentally friendly business practises in India. The institution is anticipated to assist significant industry sectors in their attempts to increase energy efficiency while boosting the national economy.

The centre will serve as a focal point for displaying non-working prototypes of tried-and-true technologies recognised under the Perform, Achieve, and Trade (PAT) programme of the BEE by enhancing access to contemporary energy efficiency services, technologies, and knowledge, he continued.

The demonstration centre has two lecture halls and three demo halls. The ground floor is reserved for the cement industry, the first floor is used for the iron & steel and pulp & paper industries, and the second floor is used for the textile and chlor-alkali industries. The energy-efficient technologies on display in these rooms include systems for pre-processing raw materials and alternative fuels, feeding configurations for calciners, and waste heat recovery techniques.

For the purpose of advanced research cooperation and technology transfer, the centre will work with foreign institutions. The hub will offer cutting-edge facilities for networking, conferences, training courses, and information sharing on energy-efficient technology once it is fully operational.

Will US Semiconductor Investment Transform India's Digital Economy?

The Indian semiconductor market was valued at USD 27.2 billion in 2021 and is expected to grow at a healthy CAGR of nearly 19 per cent to reach USD 64 billion in 2026. But none of these chips are manufactured in India so far. On his first official state visit to the United States, Prime Minister Narendra Modi extended an invitation to Micron Technology, a prominent American chip maker, to encourage semiconductor manufacturing in India. An invitation was also extended to Applied Materials to contribute to the development of process technology and advanced packaging capabilities in the country.

During his meeting with Gary E Dickerson, President and CEO of Applied Materials, the Prime Minister also discussed the potential for collaboration between the company and academic institutions in India, thereby, creating a skilled workforce that can uplift the industry.

Why semiconductor manufacturing?

It would not be wrong to say that semiconductors are an indispensable part of our lives today. This is because semiconductor chips are an integral and non-negotiable part of various entities, ranging from automobiles to electronic goods that we use in our daily lives. India is no stranger to the issues caused due to semiconductor shortages. During the COVID-19 pandemic, where factories were shut down and

demand for electronic goods increased, there was a severe dearth of semiconductor chips, placing pressure on the markets of several countries across the world. Stockpiling by Chinese companies in light of the US preventing companies using American technology from selling to China, also added to the pressure. A host of natural calamities that hit a bunch of manufacturing spots ranging from Texas to Taiwan only added to the supply crunch.

The classic case of demand overriding supply which was magnified during the pandemic, caused several countries including India to look into gaps in their manufacturing sector. To lessen the country's dependence on China, the government has cleared a 10-billion-dollar package to boost the semiconductor industry.

India and semiconductors

According to a report by Journals of India, Taiwan and South Korea houses "nearly all leading edge (sub 10nm) semiconductor manufacturing capacity". Of this, 92 per cent are located in Taiwan alone. While 75 per cent of the semiconductor manufacturing capacity is concentrated in East Asia and China. The same report also cites government data to show that India imports 94 per cent of its electronics and 100 per cent of its semiconductors.

With the present government's continued efforts to broaden the footprint of Digital India, the need for a self-sufficient semiconductor manufacturing industry within the country has gained more prominence.

"We are very very much looking forward to working together with the prime minister and every one of India to achieve tremendous success together," Mr Dickerson of Applied Materials said, adding that it is time for India to drive incredible growth.

Micron Technology, which is a global leader in memory and storage, has also expressed to manufacture in India. "We are excited about the opportunities that exist for the future of memory and storage and again, congratulations to Prime Minister Modi for his excellent visit," said Sanjay Mehrotra, President-CEO, Micron, according to news agency ANI.

Micron's investment in India comes at a time when Indian demand is projected to explode. The Indian semiconductor market was valued at USD 27.2 billion in 2021 and is expected to grow at a healthy CAGR of nearly 19 per cent to reach USD 64 billion in 2026. But none of these chips are manufactured in India so far.

In addition to Micron, Vedanta and Foxconn have also signed an MoU with the Gujarat government to invest 1.5 lakh crores to set up a semiconductor and display manufacturing plant in India.

India's Share Of Global Commercial Services Exports Doubles Between 2005-2022: Report

India's share of global commercial services exports doubled to 4.4 per cent in 2022 from 2 per cent in 2005, according to a report by the World Bank and World Trade Organization (WTO). The report titled also underlined China's double share of global commercial services exports from 3 per cent in 2005 to 5.4 per cent in 2022.

Furthermore, it said more than 10 per cent of total services sector jobs in India, South Africa and Turkey are directly linked to cross-border services exports.

It added that the developing economies have marked an impressive trade performance under this expanded measure of trade in services which is largely due to four economies namely, China, Hong Kong, Singapore and India that stood as leading services exporters and importers.

The report revealed that India and the Philippines need to focus on the upskilling and reskilling of their workforces. It stressed that the two countries should also invest in the development of their domestic services sector in special terms of R&D. This will keep them in the league of rapidly changing technology and still help them stay competitive and progress up the value chain, it added.

The study emphasised India's emergence into medical tourism and said it has hosted around 3.5 million foreign patients from 2009 to 2019.

Indian banks' credit profiles resilient amid global banking sector stress: Moody's

The credit quality of Indian banks and Non-Bank Financial Corporations (NBFCs) will remain resilient despite a challenging environment for banks globally, according to Moody's which said they are well-placed to weather global banking sector stress.

The global rating and research agency said strong domestic demand in India, improving credit conditions for bank borrowers, and strengthened solvency and funding of Indian financial institutions will support their credit quality. Also, Moody's Indian affiliate Investment Information and Credit Rating Agency (ICRA) expects the banking sector's performance to remain strong with healthy profitability — primarily driven by strong loan growth and a favourable credit environment.

Moody's said that credit conditions in India have gradually improved, with a significant reduction in the banks' legacy problem in loans over the past three years. Stress among NBFCs in India has abated too, Moody's noted.

"Banks globally are facing liquidity pressures amid tighter monetary policy, outflows of excess liquidity built up during the corona virus pandemic into more profitable investments and increased risk aversion among investors because of stress in the U.S. banking sector," said Alka Anbarasu, a Moody's Associate Managing Director.

"Indian banks, however, have strong domestic funding franchises and ample liquidity to support growth in their loans in line with India's strong economic conditions," Ms. Anbarasu added. Moody's guidance assumes important at a time when there has been instability in some banks in the U.S. One of the most prominent lenders in the world of technology startups, Silicon Valley Bank, which was struggling, first collapsed on March 10, after a run on the bank by the depositors. Its closure led to a contagion effect and the subsequent shutting down of other banks — Signature Bank and First Republic Bank. The collapse of a few regional banks in the U.S. had sent ripples across the global banking industry and posed fears of a contagion effect across economies.

www.thehindu.com

Nationwide surge in food prices shows retail inflation far from tamed

A sharp increase in the retail prices of several crucial food items over the past one month — from the essential vegetables of tomato, onion and potato to the basic cereals of rice and wheat, tur dal, the commonest protein source in vegetarian households, and even loose tea — has left households and small eatery operators scrambling to juggle their budgets.

Data from the Ministry of Consumer Affairs, Food and Public Distribution's Price Monitoring Division show that prices of 9 of the 10 key food items sampled by The Hindu — rice, wheat, tur dal, sugar, milk, tea (loose), salt (iodised, packed), potato, onion and tomato — had increased as on Tuesday from a month earlier. The price of salt alone was unchanged.

While the 0.5% month-on-month increase in milk price was the least, the prices of all three essential vegetables had risen, with potato up 8.8%, onion 11.1% higher and tomato almost twice as high as in the last week of May. 'Seasonal factors'

Union Consumer Affairs Ministry Secretary Rohit Kumar Singh said the surge in tomato prices was the result of seasonal factors.

"Across the country, tomato is grown and harvested at different points of year," Mr. Singh told The Hindu. "There are some gaps and at some points, there will be a little shortage which gets compounded by weather disturbances. It's also highly perishable. When it rains, transportation becomes an issue," he added. Traders in different parts of the country attributed the high summer temperatures this year as well as unusually sharper rain spells more recently, especially in northern States, as factors affecting the supply of vegetables this year.

<https://news.bharattimes.co.in>

Reinstatement of exception to transactions carried out through international credit cards

The Ministry of Finance ("MoF") vide a notification dated May 16, 2023, had amended the Foreign Exchange Management (Current Account Transaction) Rules, 2000 ("Rules"), and omitted rule 7 of the Rules. The omission removed the exception created for transactions through international credit cards outside India and brought these transactions under the purview of the Limited Remittance Scheme ("LRS") limits specified in Schedule III of the Rules.

The abovementioned amendment was made consequent to the changes announced to the system of Tax Collection at Source ("TCS") under the Income-tax Act, 1961 on payments under LRS, and to subject the transactions carried out by individuals through international credit cards outside

India to TCS.

Subsequently, basis numerous comments and suggestions received from various stakeholders, it was decided to postpone the implementation of the notification. Vide a notification dated June 30, 2023, the MoF has amended the Rules and added rule 7 with effect from May 16, 2023, superseding the earlier amendment and reinstating the position pertaining to international credit card transactions as it was prior to May 16, 2023.

The aforementioned was notified vide a notification dated June 30, 2023 and shall come into force with effect from May 16, 2023.

Amendment to the AIF Regulations

The SEBI (Alternative Investment Funds) Regulations, 2015 ("AIF Regulations") have been amended (available [here](#)) and the notification shall come into force with effect from June 16, 2023, unless specified otherwise. An overview of the key changes is set out hereunder:

AIFs are now required to issue units in dematerialised form, subject to the conditions specified by SEBI from time to time. SEBI has released the conditions for issuance of units of Alternative Investment Funds in dematerialised form, vide a circular dated June 21, 2023.

Schemes of AIFs are required to dematerialise all the units issued by them

Schemes with corpus more than or equal to INR 500 Crore: Latest by October 31, 2023; and
Schemes with corpus less than INR 500 Crore: Latest by April 30, 2024.

Schemes of AIFs are required to issue units only in dematerialised form

Schemes with corpus more than or equal to INR 500 Crore: November 1, 2023; and
Schemes with corpus less than INR 500 Crore: May 1, 2024.
The terms of transfer of units of AIF held by an investor would continue to be governed by the PPM, agreements executed between the AIF and the investor, and other fund documents.
Schemes of AIFs whose tenure is ending on or before April 30, 2024 are not required to comply with the aforementioned.

- ▶ AIFs would have to obtain fresh certifications before the expiry of the existing certification.
- ▶ The manager of the AIF is now required to appoint a Compliance Officer, who would be: (i) responsible for monitoring compliance with all the applicable laws; and (ii) required to independently report any non-compliance

to SEBI maximum within 7 working days.

- ▶ SEBI has clarified that in specie distribution of the assets of each scheme of the AIFs is permitted.
- ▶ The manager of an AIF is required to ensure that the AIF appoints an independent valuer to conduct the valuation of investments of the scheme of AIFs as specified by

SEBI.

- ▶ AIFs are permitted to launch a close ended liquidation scheme by filing a placement memorandum with SEBI,

through a merchant banker, for the purpose of liquidating the unliquidated investments purchased from its scheme whose tenure has expired.

RBI has expanded the scope of TReDS

The Reserve Bank of India has issued a circular dated June 7, 2023 (available here), to enhance the scope of the trade

receivables discounting system ("TReDS"). The key aspects are set out hereunder:

Particulars	Old provision	New Provision
Insurance	Insurance was not permitted for TReDS transactions	Insurance facility is now permitted for TReDS transactions to enable the financiers to hedge default risks. Insurance companies would be the fourth participant in TReDS after buyers, sellers and financiers. No insurance premium can be levied on the seller.
Financiers	Only banks, NBFC-Factors and other financial institutions permitted by RBI could be financiers	All entities permitted to undertake factoring business under the Factoring Regulation Act, 2011 are now permitted to be financiers. This may include any company engaged in the factoring business and with a registration under the Factoring Regulation Act, 2011.
Secondary transfers	Secondary transfer were not permitted	TReDS platform operators may enable secondary transfers of factoring units within the same TReDS platform, subject to the RBI guidelines for transfer of loan exposures.
Particulars	Old provision	New Provision
Settlement mechanism	Settlement of factoring units which were not discounted or financed had to be done outside the TReDS system.	TReDS platform operators can now undertake settlement of factoring units which are not financed / discounted, using the NACH mechanism for TReDS.
Bid Transparency	Bid details could not be displayed to other bidders	TReDS platform operators have the option to display details of bids placed for a factoring unit to other bidders, without revealing the bidder's name.

Recognition of General Power of Attorney and Will as documents conferring right in any immovable property is in violation of statutory law

The Hon'ble Supreme Court, in the matter of Ghanshyam vs Yogendra Rathi [Civil Appeal No. 7527-7528 of 2012] held that the fact that: (i) the parties had executed an agreement to sell; (ii) entire sale consideration as mentioned in the agreement to sell was paid; and (iii) the Plaintiff-Respondent was put in possession of the property proved that the Plaintiff-Respondent was de-facto having possessory right over the property. In this case, the Hon'ble Supreme Court while dealing with the issue of possessory rights on basis of an agreement to sell also observed as under:

- ▶ A Will comes into effect only after the death of the executant and not before it. Therefore, the Will has no force during the lifetime of the testator or any person making.

- ▶ The practice, if any, prevalent in any State or the High Court recognizing a Will and a general Power of Attorney as document of title or document conferring right in any immovable property is in violation of the statutory law.
- ▶ An agreement to sell on its own is not a document conferring title upon the purchaser in view of Section 54 of the Transfer of Property Act, 1882 however, in light of the Plaintiff-Respondent having performed his part of contract and lawfully in possession acquires a possessory title which is liable to be protected in view of Section 53A of the Transfer of Property Act, 1882.

The aforementioned Order dated June 2, 2023

“

Disruption and innovation in policy is the secret behind the Telangana model. TS iPass and Online Building Permission are some of the few examples he quoted. Drawing a parallel between the earlier two CMs Chandra Babu Naidu and Dr YS Rajashekar Reddy and their governance, he said K Chandrashekar Rao's governance is a good mix of both pro-rural, pro-farmer, pro-welfare, pro-urban, pro-development.

Speaking further he also added that in the next year, 50% of the global requirement of vaccines will be produced in Hyderabad. Responding to the request made by FTCCI President Anil Agarwal about OTS (One Time Settlement) of electricity bills, he said he will do the needful. Regarding reversing the Trade Licence system and other requests about the land of FTCCI etc, he said he would set up a meeting after consultation with Chief Minister.

Hearty welcome to the FTCCI Excellence Awards Ceremony. We are here again, celebrating another edition of FTCCI Excellence Awards! and I am truly grateful to Sri K. T. Rama Rao garu, our beloved and most popular Hon'ble Minister for agreeing to

give away the Awards for the 3rd consecutive year. Sir, we are most honoured by your presence and I must say that we are receiving more and more nominations every year as the industry feels proud to receive the award from you.

I am really proud to see that there are 22 winners in various categories. I congratulate all the winners and also all the nominees for various awards.

As Henry Ford said "Failure is a simple opportunity to begin again more intelligently"- all the nominees not selected for Award should take it in the right spirit as Henry Ford said and not to dishearten.

Sir, I am pleased to inform that State Bank of India has come forward to initiate Start-up Award and I am thankful to SBI for sponsoring the award and Sri. Amit Jhingran, CGM, who has taken initiative. I also thank Sri. Dinesh Kumar Khara, Chairman, SBI for unveiling the Award. This will encourage the start-ups to compete and be recognized among the stalwarts of industry.

The Awards are meant to recognize,

celebrate, and support the companies and individuals who made immense efforts to withstand, sustain and exemplify in the chosen areas and their tireless contribution to industrial growth.

I want to thank every organization that is part of the process, esteem Jury who has given their thoughts to the process, our partners, Excellence Awards Committee teams at FTCCI for putting in so much thought and effort for making this a huge success. I thank every dignitary sitting in the audience for joining us today to celebrate the hard work and efforts of industry (a big round of applause for all nominees and winners pl).

The state has celebrated Dasabdi Utsvalu and my congratulations and Best Wishes to all on entering 10th glorious year of State Formation. What an incredible journey we have seen in the last 9 years! (GSDP, Per Capita Income)

The credit of State's progress goes to our visionary Hon'ble Chief Minister and his team of Council of Ministers, bureaucrats, who, with their vision, mission and leadership have put the economy of Telangana not just on track but on "High Speed Track".

Sir, there is no second opinion on the fact that your charisma, dynamism and proactiveness have put Telangana in the forefront of investment destinations in India. Your recent visits to UK, and US were testimony to this and we congratulate Hon'ble Minister, Sri Jayesh Ranjan, Sri Vishnu Vardhan Reddy and whole team for making stupendous efforts and bringing huge investments into various sectors, thus creating large number of employment opportunities.

Not only is the state achieved the high growth rate, but the overall progress of the state in different parameters is evident from various Awards received by the state at national and international level. Five 'Green Apple Awards' for

'International Beautiful Buildings' from London-based independent non-profit 'The Green Organization', National Technology Award to T-Hub, 13 awards in National Panchayat Awards 2023. The list is long and exhaustive.

Sir, The National Manufacturing Innovation Survey 2021-22 done by the Department of Science and Technology, in collaboration with UNIDO has developed first Indian Manufacturing Innovation Index (IMII) for all 28 States and 6 Union Territories. I am pleased to inform you that FTCCI has supported UNIDO in conducting the survey in our State. Recently DST has released the report and we are proud that Telangana ranked 3rd among all the States and UTs in the country in IMII Rank.

I am pleased to inform that Federation has organized 3-day Industrial Innovation and Technology Expo from 28th to 30th of June at Hitex and being our maiden expo, we are extremely happy that more than 130 exhibitors have displayed their innovations and technologies and about 7000 people visited the expo. 3 countries - Mauritius, Belgium, UAE were part of our expo and a 13-member delegation from Vietnam also visited our Expo. My sincere thanks to the government of Telangana, specially to Jayesh Ranjan Sir and Vishnu Vardhan Reddy garu for their support and co-operation.

Sir, while you and your team are making efforts to bring investments into the State, we, as Federation, are promoting Brand Telangana in our own small way. We had fruitful interactions with Trade Delegations and Trade Commissioners from different countries like Belgium, Turkey, Iran, UK, Canada, Vietnam, South Africa etc. in the last year.

The Federation also led industry delegations to Thailand and Vietnam in September (8th to 11th) and December (11th to 15th) 2022 respectively. During the visits,

besides participating in number of meetings, FTCCI also signed MOUs with The Thai Chamber of commerce (TCC), Indo-Thai Chamber of Commerce (ITCC), and VCCI-HCM (Vietnam Chamber of Commerce and Industry - Ho Chi Minh City) to promote trade and investments between the countries, particularly Telangana state.

Sir, we continue to reach out to District level chambers and Tier 2 cities for promotion of business culture and conducted training programs at Nizamabad and Warangal with the support of Amazon and also Entrepreneur Development Programs at Medak, Khammam and Karimnagar. We would like to reach out all other tier 2 and 3 cities in the state and seek industries department support in this regard.

Sir, so far, we spoke only about all good and happy things. Now, with your permission, I wish to mention one or two pain points for industry that needs your intervention.

Everyone's - be it a manufacturing unit, IT industry, or commercial establishments - the main concern is "Trade License Fee" imposed on square feet basis.

Sir, members are expressing their anguish at receiving notices for payment in Lakhs of rupees towards Trade License fee and we earnestly request you to revert to the old system of having a cap on fee amount, and remove the imposition on square feet basis. Many of the states exempted or collecting trade license fee at a nominal level for manufacturing units and we request you to exempt manufacturing units from Trade License Fee. (Peddapalli instance)

No doubt state government is making maximum efforts for revival of MSME units and also trying to reduce the pending amounts by introducing One Time Settlement Scheme. The Government has introduced OTS Scheme in VAT and other taxes and also Property

Tax payment arrears/disputed amounts and giving an opportunity to the affected parties to settle the disputes amicably.

In the same manner, we request you to introduce OTS Scheme for Electricity dues, as large number of units in the State closed down the units due to their inability to pay the power bills and other charges on dues. Your positive consideration in this aspect will help many units revive their operations, thus creating large number of employment opportunities and revenue to the government as well as DISCOMs.

May I bring it to your notice that though the government is releasing certain amounts of incentives, they are not reaching the sanctioned people waiting in seriatim to receive their amounts, but are given to few units on priority basis. Sir, whatever

be the reason for skipping the seriatim and allocation of funds to the units out of line, it is upsetting those who are waiting to receive their amounts for more than 7 years now. Request you to release the funds as per seriatim to the units and provide relief to those that are waiting since long.

I am pleased to inform that FTCCI, in collaboration with Indian Institute of Economics, has prepared a report on Cost of Doing Business in Telangana vis-à-vis other states in the country as suggested by you in the last year's Awards function. We request you to give us the time to present it to you for your consideration.

Lastly, we request you to support FTCCI to take up more and more activities for the betterment of industry and trade. We are willing to set up an exhibition centre, skill

centre, Trade Facilitation Centre and also Alternate Dispute Resolution Centre to cater to the needs of start-ups, upcoming manufacturing units and industry and trade in general. For this we need land and request you to allocate — land to FTCCI to build the necessary infrastructure.

Sir, with the support of Government of Telangana we would also like to take up Cluster Development Activities and contribute to growth of industries in various Districts. My appeal to the government is to engage with Federation more often and give us opportunity to do more for the State.

Thank you once again sir for gracing the occasion and presenting the awards to the winners and making it a memorable day for all of us. Once again, my hearty welcome to everyone!

Sri Shekar Agarwal, Past President, FTCCI

Sri Devendra Surana, Past President, FTCCI

Sri K.Bhasker Reddy, Past President, FTCCI

PRESENTATION OF FTCCI EXCELLENCE AWARD 2022

- 1 Dayanand Reddy, Managing Director, Vasantha Tool Crafts Private Limited receiving **Excellence in Industrial Productivity**

Felicitation to Hon'ble Minister Sri K. T. Rama Rao

Hon'ble Minister with Partners of FTCCI Excellence Awards 2022

With Managing Committee Members and Past Presidents of FTCCI

interactive meeting with Women Development Committee (WDC) members of Maldives

15th June, 2023
Federation House, Hyderabad

The visit aims has to gain Business and Entrepreneurship knowledge and experience through a study tour in the context of Indian Business Environment in particular Telangana.

The delegation is led by Ms. NEEZA IMAD, State Minister for Economic Development, Republic of Maldives. Ms. MARIYAM NAZIMA, Deputy Minister for Economic Development and Ms Nusrath Rasheed, President of WDC, Maldives along with the other delegation were participated.

WDC, formerly referred to as Women's Development Committees, have been active in the Maldives since 1982. By the early 1990's, Women's Development Committees (WDC) were established in each inhabited island. These bodies acted as the main platform that promoted women empowerment and have been responsible in taking collective action at the community

level. WDCs played a substantial role in mobilizing women by providing an avenue for women to network, fundraise, collaborate, and implement initiatives for community development. Today these committees are a legal entity, with a stronger mandate on promoting women's participation at the local level.

FTCCI President Mr. Anil Agarwal, Senior Vice President Mr. Suresh Kumar Singhal, Vice President Mr. Meela Jayadev, CEO Ms. Khyati Naravane, Dy. CEO Ms. Sujatha, Chair of Ladies wing & women empowerment committee Ms. Bhagwati Baldwa and other senior officials were participated at the meeting. The meeting ended with Vote of Thanks.

Certification of Origin & Attestation of Export Documents

Seminar on Financial Planning & Investment Opportunities

15th June 2023
Federation House

The Inaugural session was presided over by Sri Anil Agarwal, President, FTCCI, Sri Meela Jayadev, Sr.Vice President, FTCCI, Sri Suresh Kumar Singhal, Vice President, FTCCI and Sri K.K.Maheshwari, Chair, Capital Market and Investors Committee, FTCCI and Sri Anjaneya Gautam, Director-IFD Group at JM Financial Services Ltd, Sri K S Rao, Executive Vice-President & Head-Investor Education & Development-Aditya Birla Sun Life AMC Ltd.

Sri Anil Agarwal, President, FTCCI, in his welcome speech stated the importance of financial planning and opportunities. He further reiterated that Seminar on Financial Planning is the need of the hour. He said that the future holds promising with digitization, technology-driven tools, growing middle class, and government initiatives. With the tools like financial planning software's, online brokerages, robo-advisors, and financial education resources, the future of investment opportunities seems promising and the entire ecosystem is evolving and alleviating to next level which can be benefitted by one and all.

Sri K.K.Maheshwari, Chair, Capital Market and Investors Committee, FTCCI: is a veteran in the field of Capital Markets with his own Financial Services Company which is engaged in diversified activities in financial services. He has reiterated the importance of diversification of portfolio. Moreover, he has red flagged

every one with the pros and cons of participation in Capital Markets. He has further alarmed the participants to be cautioned and wisely invest in debts and securities and Govt. Bonds as per their risk appetite

Sri Anjaneya Gautam, Director-IFD Group at JM Financial Services Ltd: He said financial planning helps you increase your savings, enjoy a better standard of living and help to be better prepared for emergencies, and have peace of mind. He further acclaims that since we may not be good at so many things, we need to take the help from a financial planner. Registered financial planners in a massive country like India has just been few, while there are 2.13 lakh across the world. Financial planning needs to be spread, he said that spending money on investments has been there either for the sake of it or for future. However, selecting the correct financial product has always been a challenge. It should be understood for youngsters that

disability insurance is more important than life insurance. Both insurances are important, while life insurance protects the family from a loss of life whereas disability insurance ensures the insured and the family both are financially protected while the insured is alive. A disability insurance policy provides an income replacement if you're unable to work due to a disability.

Sri K S Rao, Executive Vice-President & Head-Investor Education & Development- Aditya Birla Sun Life AMC Ltd. He said money speaks only one language, and that language is If you save me now, I will save you tomorrow. He added mutual funds are always your mutual friends and also he said about GDP (Goals, Dreams and Plans) saving is not about investing the leftover. Mr. Rao steadfast the entire ppt with lots of acronyms.

Meeting ended with Vote of thanks by Sri Suresh Kumar Singhal, Vice President, FTCCI.

FTCCI in association with Nakoda Chemicals Ltd and Kritsnam Technologies Pvt organized Programme on Water Security and Sustainability Approach for Industry

16th June, 2023
Federation House, Hyderabad

Mr. Anil Agarwal, President of FTCCI said, the industrial sector, being a significant consumer of water, plays a vital role in addressing this challenge. Water scarcity has become a significant challenge for many industries affecting their production capacity, profitability, and sustainability. It is imperative for industries to adopt a sustainable approach towards water usage and management. By integrating sustainable practices into their operations, industries can not only ensure their own water security but also contribute to the overall well-being of society and the environment.

Mr. G. Bala Subraamanyam, Chair, Environment Committee, FTCCI addressed a gathering on the subject "Water Conservation—What Can I

Do?". He said we must redesign the usage of water. India has more than 17 percent of the world's population but has only 4% of the world's water resources with 2.6% of the world's land area. We consume one-fourth of the globally available groundwater, more than the two countries the US and China combine.

Mr. Bala Subramanayam added that according to NITI Aayog by 2050, India is likely to experience a 6% loss in the GDP due to the Water Crisis. By the year 2030, our water demand is projected to be twice the available supply. This implies that hundreds of millions of people will face severe water scarcity.

It is a common assumption that water is free, but it is not. The various Governments have been sourcing water from hundreds of kilometres. Take for instance Chennai city sources water

from Veeranam Lake which is 235 km away, Hyderabad sources Krishna River from 130 km using expensive multi-stage pumping, Bangalore sources from Cauvery River from 95 km and Bhopal and Indore from Narmada River which is 30 km away. All this involves money, so people must know that water is not free.

So what do we need to do? Use water-efficient fixtures. He added like Energy Efficiency Ratings, we need to develop a scheme for water-efficient fixtures. Industry and big establishments - to do water audits, encourage research, Encourage make-in-India products.

The day-long program had several other sessions such as Water Auditing for Industry by Mr. Konala Kartik Reddy, Counsellor & Head Advisory Services ; Presentation on Waste Water Treatment—Nature Based Solutions by Mr. Ganges Reddy, CEO & MD, BlueDrop Enviro Private Limited ; Groundwater Governance & Rising Water Risk for Indian Businesses by Mr. Vinay Chataraju, Co-Founder & Chief Business Officer, Kritsnam Technologies Pvt. Ltd. and some experience sharing sessions – Journey of Waste Treatment to Resource Recovery Plant by Mr. K. Narayana Swamy, Manager- Environmental Engineer, Jeedimetla Effluent Treatment Limited and others.

Mr. Meela Jayadev, Senior Vice President, FTCCI proposed Vote of thanks.

FTCCI in association with HYSEA, organized IMPETUS

23rd June, 2023
Novotel HICC, Hyderabad

The Impetus conference held in Hyderabad emphasized the importance of digital transformation. The Chief Guest, Mr. SGK Kishore, Executive Director (South) and Chief Innovation Officer - GMR Airports at GMR Group, highlighted the importance of digital transformation and its impact on user experience, customer experience, bottom line, and behavior. He emphasized that digital transformation should focus on improving organizational culture and behavior while leveraging digital technologies to enhance the bottom line and user engagement.

Mr. Kishore described three key aspects of digital transformation: digitization, digitalization, and digital transformation itself. Digitization involves using digital tools, while digitalization involves bringing in digital products and solutions. However, digital transformation goes beyond these two aspects, focusing on how an organization transforms using digital technologies. He stressed that every business leader should adopt a technology-driven mindset and continuously work towards digital transformation, just like maintaining fitness.

Mr. Anil Agarwal, President of FTCCI, expressed the need to encourage MSMEs to embrace technology and digitally transform their businesses

to remain globally relevant.

Mrs. Manisha Saboo, President of HYSEA and Vice President of Infosys, emphasized the power of collaboration and highlighted the joint effort of HYSEA and FTCCI in hosting the conference.

Sri JA Chowdary, Founder of ISF and former President of HYSEA, shared his experiences and emphasized the importance of digital transformation for survival. He narrated an incident where a PSU spent a significant amount of time building a large data logger that ultimately failed, but a small imported machine performed the job effectively. This highlighted the risks of not embracing digital transformation and the need to learn from failures. He cited examples of banks operating with fewer branches but handling more transactions as a result of digital transformation.

Shri K Mohan Raidu, CEO of Informatics India and Chair of the IT Committee at FTCCI, stressed the importance of digital transformation in reducing operating costs and increasing efficiency.

Pankaj Diwan, Founder and CEO of Ideas labs Future Tech Ventures, moderated a fireside chat with Raja, Chief Executive Officer of Biliti Electrics, during the conference. Diwan explained that Impetus aimed to bring together business leaders from traditional industries and IT solution providers to create awareness and promote the implementation of digitalization in core business processes.

The conference featured four different tracks focused on specific industries: Agri-tech, Food Processing, Manufacturing, and Pharma and Healthcare. These tracks explored the

potential of adapting and accelerating digital transformation and digital innovation within each sector.

Overall, the Impetus conference provided a platform for collaboration and knowledge exchange, with

the objective of promoting digital transformation and its implementation across various industries. The event aimed to inspire businesses to view themselves as technology companies and integrate digital strategies into

their operations to enhance efficiency, reduce costs, and ensure long-term survival in a rapidly evolving digital landscape.

FTCCI in collaboration with Isha Foundation organized **International Yoga Day - Promoting Health and Well-being through Yoga and Meditation**

21st June, 2023
Federation House

The Federation of Trade Chambers of Commerce and Industry (FTCCI) in collaboration with the renowned Isha Foundation, organized a Yoga session to celebrate International Yoga Day on 21st June 2023. The event aimed to promote the physical, mental, and spiritual benefits of yoga and meditation. Highlighting the importance of celebrating International Yoga Day, Mr. Anil Agarwal, President of FTCCI, stated, "Yoga is a profound tool for achieving balance and harmony in our lives. By organizing this event,

we aim to create awareness about the immense benefits of yoga and its potential to improve physical health, mental well-being, and productivity." Ms. Surekha, Isha Foundation stated,

"Yoga is a powerful tool for self-transformation, and through events like this, we hope to inspire FTCCI employees to incorporate yoga into their daily lives and experience the profound impact it can have on their overall well-being." The International Yoga Day celebration organized by FTCCI Skill Centre and the Isha Foundation received overwhelming positive feedback from participants. Ms. Geeta Naresh from Isha thanked participants for their engagement in yoga and meditation practices, emphasizing the sense of peace, rejuvenation, and connectedness they experienced.

Industrial Innovation & Technology EXPO 2023

Hon'ble Minister Jagdish Reddy inaugurated the FTCCI's IITEX-2023 at the HIITEX exhibition Centre in Hyderabad. This three-day exhibition, jointly hosted by FTCCI and the Telangana government, aims to showcase industrial innovation and technology. The event witnessed the presence of notable figures such as Dr. E. Vishnu Vardhan Reddy, Spl Secretary of the Telangana government, Dr. C. Tara Satyavathi, Director of ICAR-Indian Institute of Millets Research, Dasari Balaiah, Regional Passport Officer, and Srinivas Rao Mahankali, CEO of T-Hub.

The exhibition, held at Hitex in Madhapur, featured 120 stalls and celebrated MSME Day. A delegation of fourteen businesses from Vietnam also visited the expo, leading to overwhelming response and more than 100 scheduled B2B meetings. The event received support from various organizations, including ICICI, FOUR SOLAR, Quantum Energy, Standard Kitchens, World Trade Centre, Pokarna,

TSIIC, TSREDCO, IIMR, Ministry of MSME, ICRISAT, BNI, T HUB, IIP, GRID CLUB, T Works, and TSTPC.

Both international and domestic exhibitors participated, with companies like Cet Power Solution from Belgium, the Economic Development Board Mauritius from East Africa, and the Government of Ras Al Khaimah from UAE representing

the international front. Domestic exhibitors included Gujarat Informatics Limited GIL, Hypercube Analytics Pvt. Ltd, Automation Solutions, Jarsh Innovations Private Ltd, Four Solar Energy Systems Pvt Ltd, and Sadhguru Audit and GRC Solutions Pvt Ltd. These companies showcased a wide range of innovative products and solutions, such as the world's first air-conditioned

helmet by Jarsh Innovation Private Ltd and Greenko's renewable energy solutions.

During his speech, Minister Jagdish Reddy highlighted the remarkable development achieved by the Telangana state in just nine years, attributing it to the visionary policies and governance of Chief Minister K. Chandrashekar Rao. He emphasized the elimination of power cuts and holidays, achievements that set Telangana apart from other states in India. The Minister also urged the FTCCI to organize similar exhibitions in district headquarters.

Dr. E. Vishnu Vardhan Reddy expressed pride in the international participation

at the expo and emphasized the holistic and inclusive growth witnessed by the Telangana state. He emphasized the importance of innovation, infrastructure, and inclusive growth in transforming the state into an industrialized economy. Dr. C. Tara Satyavathi from ICAR-Indian Institute of Millets Research highlighted the need to promote the growth of nutri cereals (millets) for nutritional security and their significant export potential.

Other speakers at the inauguration included Dasari Balaiah, Regional Passport Officer, who discussed the efforts made to process a rising number of passport applications by opening

Post Office Passport Seva Kendras on Saturdays. Srinivas Rao Mahankali, CEO of T-Hub, expressed his interest in collaborating with FTCCI to build a stronger entrepreneurial ecosystem and support scaling startups. The event was attended by Mr. Meela Jayadev, Senior Vice President, Mr. Suresh Kumar Singhal, Vice President, Ms. Khyati Narawane, CEO of FTCCI, and other distinguished guests.

The IITEX expo concluded with B2B Meetings, and on the final day, FTCCI extended an invitation to Shri. E.V. Narasimha Reddy IAS, Vice Chairman & Managing Director of TSIIIC. He toured all the stalls and presented mementos to the exhibitors.

Webinar on PMLA- Implications for professional and Business : 27th June, 2023

Program on Effective Interpersonal Skills for Enhancing Organizational Productivity

27th & 28th June 2023
FTCCI Pokarna Skill Centre

In total 40 participants from various corporate segments attended the program with an intention to learn the necessary interpersonal skills to master themselves to build stronger relationships, navigate conflicts, communicate effectively, collaboration & contribute to a more productive work environment. Eminent speakers took sessions during training program like Mr. Harjeet Singh Kalsi, Mr. Rajesh Parshad, Prof. John Gutty, Mr. Radha Krishh. The corporate training program successfully achieved its objectives by equipping participants with essential interpersonal skills and fostering a positive work environment. The program's content, delivery methods, and interactive approach received positive feedback from participants, indicating high levels of engagement

and satisfaction. The outcomes of the program, including improved collaboration, conflict resolution, and productivity, highlight the effectiveness of the training in enhancing employees' interpersonal skills and overall workplace performance.

Based on the positive outcomes and participant feedback, it is recommended to continue and expand

similar training programs in the future to further strengthen the interpersonal skills of employees and create a more productive and harmonious work environment. FTCCI President Shri Anil Agarwal and CEO FTCCI Ms. Khyati Naravane interacted with participants during the inauguration. Program concluded with valedictory ceremony.

Program on Image Building and Online Positioning of Products & Services - Advanced Techniques in Digital Marketing

The Federation of Trade Chambers of Commerce and Industry (FTCCI) has launched an innovative program titled 'Image Building and Online Positioning of Products & Services - Advanced Techniques in Digital Marketing' on 30th June 2023 through its Skill Centre. The program aims to equip businesses with the necessary knowledge and skills to leverage digital marketing

strategies effectively, enhancing their online presence and driving business growth.

The program, organized in collaboration with industry experts and digital marketing professionals, will run for several weeks and is open to businesses of all sizes and sectors. Participants will have the opportunity to learn advanced techniques and best

practices in digital marketing, enabling them to position their products and services effectively in the online marketplace.

With the advent of the digital age, establishing a strong online presence has become vital for businesses to remain competitive and reach their target audiences effectively.

Two day Start - up Boot Camp under Start-up Fest

1st & 2nd July, 2023
FTCCI Pokarna Skill Centre

The 2-Day Start-up Boot Camp under the Start-up Fest successfully fulfilled its objectives by equipping aspiring entrepreneurs with the knowledge, skills, and resources necessary to embark on their start-up journey. The engaging and interactive sessions, coupled with networking opportunities

and mentorship, contributed to the positive outcomes reported by the participants. The boot camp served as a valuable platform to inspire, educate, and empower the participants, ultimately fostering the growth of the start-up ecosystem which was organized in collaboration with 'The Indian Conclave' in FTCCI Skill Centre.

Based on the positive outcomes and participant feedback, it is recommended to continue organizing similar start-up boot camps in the future to nurture and support aspiring entrepreneurs, further promoting innovation and entrepreneurship in the community. A total of 137 students from school and colleges have attended the bootcamp with 15 Team Members and 2 Mentors.

Sri Anil Agarwal, President, FTCCI addressing at the Seminar on "Corporate Compliance" organized by BNI BANDHAN in association with FTCCI on 1st July 2023 at FTCCI Surana Auditorium, Red Hills, Hyderabad. During the program Mr. Pavan Kumar Bhattiprolu delivered a talk on Compliances for SME & start ups and critical issues relating to IPR and Mr. Subbarao Kesavarapu delivered a talk on benefits under GST for MSME Business. Sri Srinivas Garimella, Chair, Industrial Development Committee and Sri Meela Jaydev, Sr. Vice President, FTCCI were participated.

Inbound Trade delegation from Gia Lai Province, Vietnam

President, FTCCI welcome the entire delegation to the IITEX and wish them fruitful and transformative business opportunity.

Top three company participated in the B2B meeting from Gia Lai Province, Vietnam are as follows:-

1. Hoang Anh Gia Lai - Joint Stock Company
2. Truong Sinh - International Science Development Company Limited
3. Hung Thom Gia Lai - Agriculture And Service Cooperative

The B2B meeting has benefitted both the countries and provided opportunities to the exporters and importers to establish connects which will convert in potential business in future.

28th June, 2023 HICC, Hyderabad

FTCCI was privileged to host a B2B meeting for the Inbound Trade delegation from Gia Lai Province, Vietnam. The event was organised in the side-lines to Industrial Innovation & Technology Expo (IITEX) on 28th June, 2023 at IITEX, Hyderabad.

The delegation represents companies from sectors such as Pharmaceuticals, medicinal herbs, medicinal products,

Aquatic drugs, Coffee, Vegetables, Pepper, Rubber along with other senior bureaucrats from the Gia Lai Province, Vietnam.

Mr Duong MahTiep, Vice Chairman Gia Lai province / Head of delegation has deliberated about the different products and initiatives taken by Vietnamese government to build bridges and foster cooperation in various domains between both the countries whereas Mr Anil Agarwal,

Strong ecosystem for MSEs in Telangana

CMIE in its March update indicates that Telangana has 4.1% unemployment while AP recorded 7.7% unemployment. India's unemployment rate is around 7.45%

Over the last nine years, Telangana has become the most preferred investment destination for high-tech manufacturing in India. The State has ensured that 'Made in Telangana' is now a tagline that is being seen and used by people across the globe. As of March 2023, official figures show that investments during 2022-23 shot up to a staggering Rs 49,579.18 crore.

It is easy to get a good estimate of employment from the corporate manufacturing sector and the medium enterprise sector as they are verifiable from the CMIE database and Director General of Employment, Ministry of Labour. But it is not so easy in the case of manufacturing micro and small enterprises (MSEs).

Manufacturing MSEs

Most MSEs are expected to maintain muster roll. Once they maintain muster roll, they have to pay the Employees' State Insurance monthly. At least 85% of enterprises find it cost-effective to engage contract labour who are mostly migratory in character. Such migratory labour is found cheaper to engage than the local ones, despite giving them rented accommodation and festival leave fare concessions, and they are also reported to produce higher output. It is here that the labour intensity of the manufacturing MSEs is shrouded in mystery.

It will, however, be interesting to view

the progress of the State regarding employment from the data on TS-iPass approvals and Udyam registrations. The catch in Udyam registrations is that the existing units also enrol and not just the new enterprises. The national level data that comes from the Bureau of Labour Statistics gives us the clue and it is worth comparing Telangana with the national statistics on labour at one end with those of some other progressive industrial states.

The latest Periodical Labour Force Survey holds testimony to the increase in manufacturing employment by about 5% in 2021 and about 8% in 2021-22. Several

 Industrial Health
 Clinic Ltd (TIHCL),**

field studies revealed severe job losses during the Covid-19 period, particularly among the manufacturing MSEs. Viewed against the backdrop of three million job losses in manufacturing between 2011 and 2018, creation of 6 million jobs during the post-covid period 2021-22 is remarkable.

Unemployment Rates

It is also pertinent to look at the unemployment rates among the States and see where Telangana stands. Telangana at the time of formation in 2014 had the notoriety of having Mahabubnagar and Palamuru districts as the icons of outbound seasonal migration in India. Now, these two districts no longer figure on the list.

The Centre for Monitoring Indian Economy (CMIE), a private organisation, in its 1 March 2023 update, estimates India’s unemployment rate in India is around 7.45% at present. It is 7.93% in urban India whereas only 7.44% in rural India. State-wise unemployment data released by the CMIE indicates that Telangana has 4.1% unemployment similar to Tamil Nadu, another progressive industrial State, while Andhra Pradesh recorded 7.7% unemployment.

Telangana’s strong industrial ecosystem, particularly, the manufacturing MSEs that front-end the supply chains, has supportive institutions like the T-Hub for startups, We-Hub for women entrepreneur startups, T-Works for the manufacturing startups, Research, and Innovation Centre of Hyderabad (RICH) and Telangana Industrial Health Clinic Ltd (TIHCL), the only institution of its kind focusing on the revival of micro and small manufacturing in addition to lending directly to such manufacturing enterprises and clusters. All these institutions work on the principles of autonomy, accountability and transparency. There is no interference by the State government in their daily functioning. At the same time, they work in close coordination with the government and execute the policies at the required speed and to the satisfaction of the industrialists it attracts.

De-stressing Enterprise

It is the foresight and vision of the government in the very first few years of its creation that led to the setting up

of Telangana Industrial Health Clinic Ltd, targeting the revival and restructuring of micro and small manufacturing enterprises as one of its principal objectives. To this extent, it prevented the closure of viable manufacturing micro and small enterprises both through strategic and financial support to bring them back to health, thereby helping in sustaining employment in those enterprises.

This institution removed the stress of 612 enterprises during the last two years, and these were considered potentially viable by the SLBC during this period. The details for the last quarter ending March 2023 indicate 7,309 enterprises were under stress while barely 6 enterprises were resolved with an outlay of Rs 3.56 crore. The data includes both manufacturing and services.

Social impact measured in terms of employment sustainability involves around 4,700 persons approximately while machinery worth around Rs 195 crore has been restored to near full capacity measured in terms of an average of six persons and Rs 25 lakh machinery value per enterprise.

Telangana with its advanced information technology infrastructure for startups is a strong candidate for manufacturing micro and small enterprises with its focused 12 MSME Parks. Handloom and power loom clusters and apparel, gems and jewellery, artisan clusters, woodcraft, precision tools, auto components, particularly for electric vehicles, plastics, packaging of various varieties, toys, artefacts, etc, have immense potential in the next two years.

Large manufacturing enterprises that have already set shop in the State offer immense potential for progressive micro and small enterprises. Training, consulting and advisory services, human resource, digitalisation and handholding at an affordable cost as cohorts of the TIHCL can ensure delivery of quality and timeliness in delivering their output. Golden Telangana with multi-sector excellence and grossly reduced inequalities is thus a delivered promise of Chief Minister K Chandrashekhara Rao.

Amendments to Electricity (Rights of Consumers) Rules, 2020

Amendments to Electricity (Rights of Consumers) Rules, 2020

Introducing Time of Day (ToD) Tariff and Simplification of Smart Metering rules

The Government of India has introduced two changes to the prevailing power tariff system, through an amendment to the Electricity (Rights of Consumers) Rules, 2020. The changes are: introduction of Time of Day (ToD) Tariff, and rationalization of smart metering provisions.

Introduction of Time of Day (ToD) Tariff

Rather than being charged for electricity at the same rate at all times of the day, the price you pay for electricity will vary according to the time of day. Under the ToD Tariff system, Tariff during solar hours (duration of eight hours in a day as specified by the State Electricity Regulatory Commission) of the day shall be 10%-20% less than the normal tariff, while the tariff during peak hours will be 10 to 20 percent higher. ToD tariff would be applicable for Commercial and Industrial consumers having Maximum demand of 10 KW and above, from 1st April, 2024 and for all other consumers except agricultural consumers, latest from 1st April, 2025. Time of Day tariff shall be made effective immediately after installation of smart meters, for the consumers with smart meters.

Union Power and New & Renewable Energy Minister Shri R. K. Singh said that the ToD is a win-win for consumers as well as the power system. "The ToD tariffs comprising separate tariffs for peak hours, Solar hours and normal hours, send price signals to consumers to manage their load according to the Tariff. With awareness and effective utilization of ToD tariff mechanism, consumers can reduce their electricity bills. Since solar power is cheaper, the tariff during the solar hours will be less, so the consumer benefits. During non

solar hours thermal and hydro power as well as gas based capacity is used – their costs are higher than that of solar power – this will be reflected in Time of Day Tariff. Now consumers can plan their consumption in order to reduce their power costs – planning more activities during solar hours when power costs are less."

The Union Minister said that the ToD mechanism will also ensure better grid integration of Renewable Energy sources thereby facilitating faster energy transition for India. "The ToD tariff will improve the management of renewable generation fluctuations, incentivize demand increase during the periods of high RE generation hours and thereby increase grid integration of larger quantity of renewable power," Shri R. K. Singh said.

Most of the State Electricity Regulatory Commissions (SERCs) have already implemented ToD tariffs, for large Commercial and Industrial (C&I) category of consumers in the country. With installation of smart meters, the ToD metering at domestic consumer level will be introduced as per Tariff Policy mandate.

Time of Day (ToD) tariff, is recognized globally across electricity industries, as an important Demand Side Management (DSM) measure which is used as a means of incentivizing consumers to shift a portion of their loads from peak times to off-peak times, thereby improving the system load factor by reducing the demand on the system during peak period. Various statutory provisions already exist to enable and promote implementation of ToD tariff (i.e. Tariff Policy, 2016, Electricity Act, 2003 and National Electricity Policy, 2005).

Rules regarding amendment made in smart metering provision

Government has also simplified the

rules for smart metering. To avoid inconvenience / harassment of the consumers, the existing penalties for increase in consumer's demand beyond the maximum sanctioned load / demand have been reduced. As per the amendment in metering provision, post installation of a smart meter, no penal charges will be imposed on a consumer based on maximum demand recorded by the smart meter for the period before installation date. Load revision procedure has also been rationalized in a way that maximum demand shall be revised upwards only if sanctioned load has been exceeded at least three times in a financial year. Moreover, smart meters shall be read remotely at least once in a day and the data shall be shared with Consumers in order to enable them to take informed decision about consumption of electricity.

The Electricity (Rights of Consumers) Rules, 2020 were notified by the government on December 31, 2020, based on the conviction that power systems exist to serve consumers and that consumers have rights to get reliable services and quality electricity. The Rules seek to ensure that new electricity connections, refunds and other services are given in time-bound manner and that willful disregard to consumer rights results in levying of penalties on service providers and payment of compensation to consumers.

The current amendment to the Rules is a continuation of the measures taken by the government, to empower power consumers, to ensure 24X7 reliable electricity supply at affordable cost, and to maintain a conducive ecosystem for investment in the power sector.

Why India Risks falling Behind in The AI Race:

The country's coding powerhouses are taking a timid approach to the technology behind platforms like ChatGPT.

Andy Mukherjee

India's tech industry is being less than bold in embracing artificial intelligence. It's hoping to create solutions for corporate clients by building on top of somebody else's investment in foundational technologies, hardly a strategy for pathbreaking success. ChatGPT's high-voltage debut last year has galvanized China. Baidu Inc.'s Ernie, which claims to have outperformed Microsoft Corp.-backed OpenAI's model on some measures, has pulled Ant Group Co. and JD.com into the bot-building race. Tech czars like Wang Xiaochuan, the founder of the search engine Sogou, have also joined the quest, drawing talent to the industry. On money flow, the US is still beating China six to one, but the number of venture deals in the Asian country's AI industry is already outpacing consumer tech, according to Preqin data

India's startup landscape, meanwhile, is caught in a time warp, with embarrassed investors marking down their stakes in Byju's, an online education company collapsing under the weight of its own reckless growth. The easy funding from the pandemic era has dried up. As financiers push founders for profitability, they're discovering that in many cases even the revenue is fake.

This was the perfect time for the traditional Indian coding powerhouses – the likes of Tata Consultancy Services Ltd. and its rival Infosys Ltd. – to put their superior financial muscle to use and assert leadership in generative AI. But they have their own governance challenges. TCS is distracted by a bribes-for-jobs scandal in the US that it is desperately trying to downplay. Infosys is busy managing the blowback from its association with an Australian lobbying firm in the center of a parliamentary inquiry Down Under.

Even without those challenges, the outsourcing specialists aren't exactly in a sweet spot. Demand for their services is weak, particularly because of the turmoil in global banking. Decisions on IT spending have slowed. Keener competition for a smaller pie could mean a fall in order wins and deterioration in pricing, JPMorgan Chase & Co. analysts said earlier this month. Meanwhile, the Indian firm's wage bills are bloated, thanks to their hiring spree during the pandemic when clients were scrambling to digitize their operations.

No wonder then that the industry's approach to AI is defensive, geared toward assuring investors that the technology poses little threat to its time-tested model of labor-cost arbitrage. When three lines of C programming replaced 30 lines of assembly language, it didn't lead to mass layoffs but an explosion in code-writing. Similarly, when outsourcing made enterprise software cheaper, IT budgets didn't deflate. Volumes rose, as prices fell. Why should this time be different, asks the TCS annual report for 2022-2023.

This is a rather phlegmatic reaction to a revolution whose possibilities are

beginning to scare its own creators.

ChatGPT can surely write snippets of code or run a quality check on them, potentially reducing billing hours. But that's hardly the point that needs addressing. Being around machines that are smarter than any of us has troubling prospects for the future of humanity, especially if the algorithms come to be controlled by evil actors. Even leaving aside those profound concerns about a potentially dystopian future, the more prosaic questions are also of significance for users of enterprise software. Companies from banking to retail and aviation must decide their engagement with so-called large language models. And they can't be sure if taking something off the shelf is good for data privacy. What exactly are Indian firms doing to grab this opportunity?

Bengaluru-based Infosys has adopted a mix-and-match strategy, so its clients can choose from 150 pre-trained models across more than 10 platforms, and then run them on any cloud or in-house servers. The TCS annual report says that its research in large language models is oriented toward "creating techniques for controlled code generation, question answering, consistent image generation, solving optimization problems and other core AI problems."

However, if Alphabet Inc. is cautioning employees about how much information they can share with chatbots, including its own Bard, then how can TCS or Infosys assume that global multinationals will be comfortable pitching their tents on platforms available to just about anyone?

Indian software services firms also ought to be building language models from scratch for themselves and their customers. Yes, it takes computational power and engineering talent to train neural network-based programs on vast amounts of natural-language inputs. But to not go down that route and look to connect clients via application programming interfaces, or APIs, to existing products is unnecessarily timid, especially when no serious business might want to rely on a publicly available external

foundational model for mission-critical tasks.

Google's own research on training data extraction, or the potential for models to leak details from the data on which they're trained, shows that the risk is very real.

Creating well-guarded, proprietary foundational technologies isn't particularly resource-intensive. To Nvidia Corp. cofounder Jensen Huang, whose chips are at the center of the AI excitement, even a modest \$10 million budget for large-scale models is not unrealistically low. Countries that aren't traditionally known as tech producers are also getting noticed for their breakthroughs. Abu Dhabi's Technology Innovation Institute has made its Falcon 40B – trained on 40 billion parameters – royalty-free for commercial use.

The Chinese have clearly not bought into the idea that Silicon Valley will control the keys to generative AI. While Indian software firms' excessive service orientation has meant very few successes in developing products, now is the time for some ambition, and a new strategy that goes beyond charging customers a fee for tweaking OpenAI's GPT-4, Google's Bard or Meta Platforms Inc.'s LLaMA with specialist data. ((Disclosure: Bloomberg has announced its own language model for finance.))

On a recent visit to the country, OpenAI Chief Executive Officer Sam Altman was asked if someone in India with \$10 million to invest should dare to build something original in AI. He said: "The way this works is we're going to tell you it's totally hopeless to compete with us on training foundation models (so you shouldn't try, and it's your job to like, try anyway."

The message from Abu Dhabi is very clear: Bengaluru should try anyway.

Rupee Outlook for July 2023

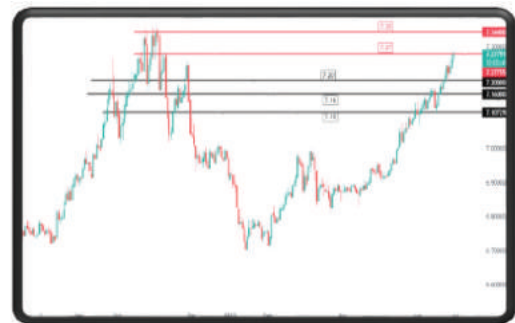

USDINR is expected to trade within the range of 81.60-82.95 for July 2023

Article by Anil Kumar Bhansali, Head of Treasury -Finrex Treasury Advisors

Potential inflows, risk on domestic market sentiments with Nifty and Sensex trading at a life time high amid improving economic data and easing oil prices is expected to help Rupee. However, RBI is protecting both sides of the pair thus keeping USDINR in the range. Immediate support lies at 81.80 below which doors will be open for 81.60. While breach of crucial resistance of 82.20 will lead upside move towards 82.65-82.95.

Key Triggers

- FOMC Policy:** Next meeting is on 26th July 2023 and it is anticipated that Fed could raise the interest rates by 25 bps following a pause in June and series of upbeat US data.
- Chinese Yuan:** CNH has slipped to 7-months low of 7.27, if it sustains above this then 7.35+ is expected. But, if it respects 7.27 then on downside 7.20 is the key support zone below which 7.16-7.10 is the next support level.

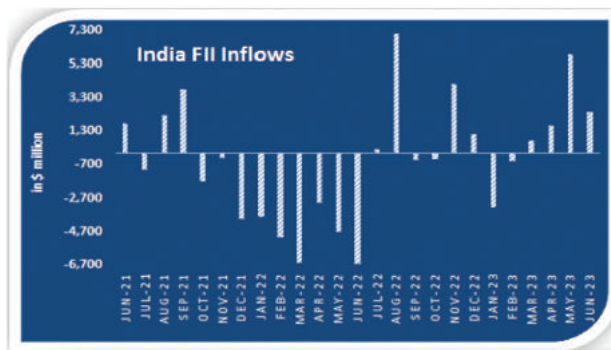

- Brent oil prices:** We can expect oil prices to move towards \$70.15 and then 66.30/bbl as fears over economic slowdown especially in China may hurt oil demand outlook. This may also offset any positive impact of supply cuts from OPEC

if any in its meeting on 5 July.

- d) **Current Account Deficit:** As current account moderates mainly due to fall in oil prices and commodities prices, Rupee is expected to gain slightly from 82.0 to possibly 81.60 as RBI continues to accrue Foreign Exchange from inflows and outflows moderate. Any upticks to the Rupee towards 83.0 should be a good level to sell the same as premiums fall.
- e) **Trade Balance:** With oil prices lower, the trade deficit is likely to shrink towards \$16-18 bn in coming months, ensuring the CAD narrows further. As per Reuters poll, the CAD is expected to average -1.5% of GDP this fiscal year and -1.8% next, compared with -2.0% in the fiscal year just ended
- f) **FII flows:** With the Indian economy shining like a bright spot in a troublesome global macro backdrop, FII investment on Dalal Street has crossed the \$10 billion mark in FY24, propelling Nifty to a record peak above the 19000 mark. With more potential FIIs inflows in pipeline in July may strengthen the Rupee.

- g) **FX Reserves:** RBI will continue to buy dollars at lower levels and absorb the inflows. We can once again see reserves to reach \$610+ bn mark in coming few weeks.
