Even as Hyderabad has been the test bed for 5G technol-ogy, Telangana has already created a regulatory frame-

the test bed for SG rechnology, Telangana has already created a regulatory framework that will hasten the rollout process, IT Principal said on Saturday.

The framework will include a simple and streamlined procedure, including the right of way for setting up infra, towers and base stations, he said. "Telangana "" the same with 4G, which faster a rollout. rollout was done peatedly said the where it reached where it reached the where it reached the where it reached to the whore it reached to the where it reached to the whore it is the wh

Keeping pace with tech "This is clearly a case where regulation has not been able to keep pace with technol-

knowledge institutions, ITT-H has conducted a series of experiments on SC, which is now a proven technology, he said.

IIT-H, which had a head-start in SG, is now entering into a partnership agree-ment with the University of Oulu, Finland, for taking up further works in the area The university already has a
